Expertise B, supply, installation, maintenance and repairs the following Range of Flooring.

- Raised Access Flooring (Steel or Wooden Panel)
- Anti-static Floor Rubberizing
- Floor Ramp and Step
- Suction Lifter Tool or Tile Lifter
- Floor Air Grille

The purpose of a raised access flooring or raised access computer floor is to provide elevated structural floor above a solid substrate to create a hidden void for the passage of mechanical, electrical and data services.

Expertise C, supply, installation, maintenance and repairs the following Range of Monitoring Systems.

- Room temperature
- Water Detection
- Humidity
- UPS
- Fire Suppression
- Air Conditioner
- Power
- Generator and Fuel level
- Access and Security

The purpose is to monitor the regular observation and recording of activities taking place in a project or programme. It is a process of routinely gathering information on all aspects of the project and the project manager can access what is working and what is not working, from there can determine what changes should be made to a project.

Our Core and Mission

Our visions are built around our "core competencies" that embody the accumulated knowledge, attitudes and skills of the Enterprise. These competencies will allow us to be the Industry Leader in Africa through:

- On Time Delivery
- Factory Management
- Product User friendliness
- Factory Management
- Accountability
- Customer Satisfaction
